

Connectivity

The connected workshop

The workshop of the future

Digitalization and connectivity in the world of repair and maintenance
Dialogue of car, workshop and equipment
Customer experience, optimization & productivity

- ✓ Workshop's digital framework
- ✓ New organizational solutions
- ✓ New Marketing & customer experience
- ✓ Integrate equipment in digital information flow
- ✓ Remote control

WIFI connectivity for Ecotechnics A/C stations

The “connected workshop” is one of the most recent and changing market trends.

The digital framework offers endless opportunities to combine new workshop organization solutions. An attractive and rewarding customer experience that is consistent with upcoming online services designed to increase the workshop's business and profitability.

New Generation Ecotechnics A/C Service Stations are connective with WI-FI to integrate in workshops digital work processes and information flow on smartphones (with Android or Mac application) or tablets, remote checks on machine status and operation, and automatic software updates.

Data and information of the station can therefore be displayed such as the progress of the work-flow, the end of the work, the machine status, the residual quantity of refrigerant in the tank ...

ECK FLAG

WIFI connectivity is an internal standard feature

ECK NEXT

WIFI connectivity is an upgrade option: hardware KIT:WIFI can easily be installed by USB plug in.

KIT.WIFI: aftermarket upgrade option for ECK NEXT
