SOFTWARE UPDATE

CAR 59.0.0

The **CAR 59** update includes a wide selection of diagnostic functions that are not limited to error code or parameter reading, but they offer the opportunity to carry out specific adaptation functions and adjustments which are unmatched on the market of multibrand diagnosis.

The developments completed for the **SUPERCAR** category are very important, in particular for the makes **ASTON MARTIN, BENTLEY, LAMBORGHINI, PORSCHE, ROLLS-ROYCE** and the following systems: Immobiliser, Petrol injection, Body computer, A/C system, Sound system, Seat adjustment, Multi Contour driver's seat adjustment, Passenger's seat adjustment, Adjustment of the rear seat on the driver's side, Adjustment of the rear seat on the passenger's side, Steering electronics, Spoiler adjustment, Comfort system, Gear selector lever, Central console controls, Multifunction display, Navigation system, Auxiliary control unit and many more. In the **CAR** environment, TEXA's technical developers concentrated particularly on the **safety and driving aids** such as: Parking assist, Lane change assistance, Lane keeping assistance, Lane departure warning, Radar sensors control unit, Front video camera control unit, Distance control, Drive Kit Plus, Stolen vehicle location, Blind spot module, Tyre pressure, Road marking recognition, Safety Pedestrian Impact, Night vision system, Multifunction video camera, Rear-view video camera, 360° video camera.

CAR 59 includes almost **44,000 new possible selections** for the main makes on the international market, among which: **ABARTH, ACURA, ALFA ROMEO, AUDI, BENTLEY, BMW, CHEVROLET, CHRYSLER, CITRÖEN, DACIA, DAEWOO, DAIHATSU, DODGE, DR, EMER, FERRARI, FIAT, FORD, HAFEI, HONDA, HYUNDAI, INFINITI, JAGUAR, JEEP, KIA, LADA, LAMBORGHINI, LANCIA, LEXUS, MASERATI, MERCEDES-BENZ, NISSAN, OPEL (GM), PEUGEOT, PLYMOUTH, PORSCHE, RENAULT, ROLLS- ROYCE, ROVER, SAAB, SCION, SMART, SEAT, SKODA, SSANGYONG, SUBARU, TOYOTA, VOLKSWAGEN, VOLVO.**

NEW SOFTWARE FEATURES FOR AXONE 4 Mini

CONVERTER APP MEASUREMENT UNIT CONVERTER

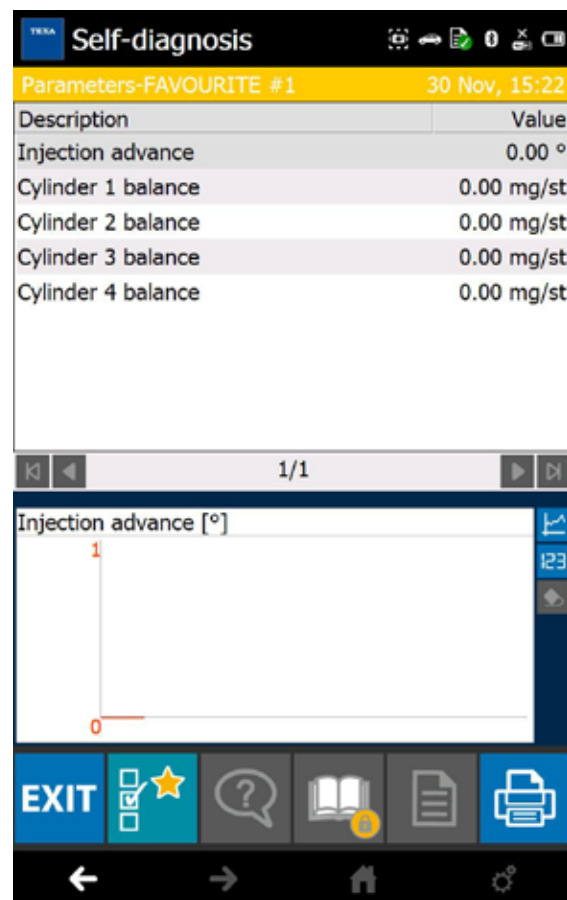

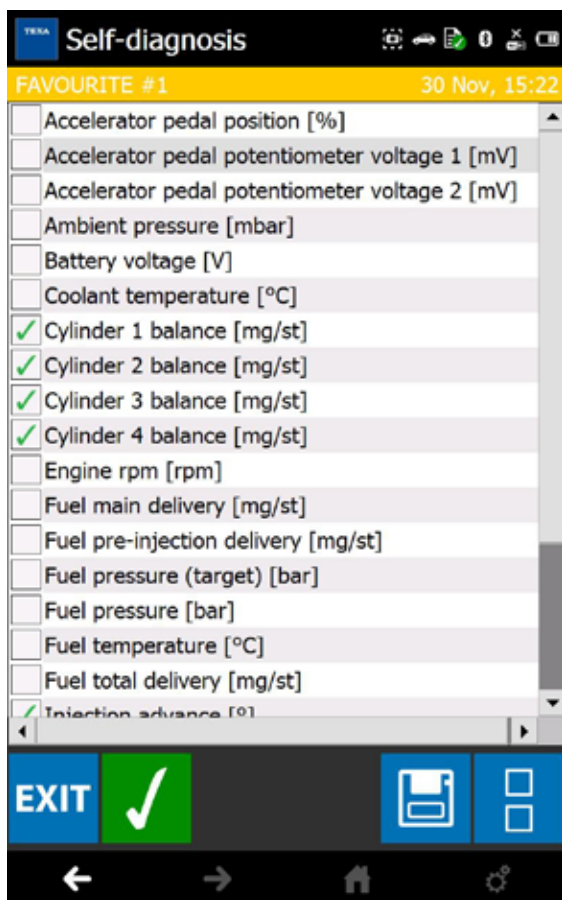

CONVERTER is the APP by TEXA that allows you to convert various units of measurements quickly and directly from the software. It is of valuable help for every vehicle repairer that each day has to compare many measures and values coming from the control units on the vehicles. Thanks to this APP you can select the unit of measurement you want to start from, enter its value and select the unit of measurement you wish to convert it into.

FAVOURITE PARAMETERS

FAVOURITE PARAMETERS is the innovative function by TEXA that allows you to create, for a certain diagnostic session or for a certain diagnostic system, a page dedicated to the parameters you consider more important. Furthermore, you can create various pages in which the parameters are divided into logical groups, enabling different views of the same diagnostic session. For example, you will be able to manage two logical groups (rpms and temperatures) in which the first group will contain all the parameters related to the number of revolutions (engine speed, turbine speed, ...), and the second those related to the temperatures (transmission fluid, engine oil, ...). Lastly, you can save the logical groups associated to that particular session in order to have them available in a following work session.

WARNING FOR USERS WHO HAVE OLD GENERATION TOOLS

Due to the evolution of vehicle electronics, the use of new generation TEXA tools, offering state-of-the-art technological solutions has, by now, become essential. This is why, for certain new diagnostic systems and for those already present within the previous versions, but updated in this new version, the relative diagnostic operations may not be available using obsolete tools (AXONE 2000, NAVIGATOR CLASSIC, NAVIGATOR MOBILE, AXONE 3 MOBILE with A-DIA module, TRIBOX MOBILE with A-DIA module).

For further information, contact your TEXA retailer.

WARNING

The trademarks and logos of vehicle manufacturers in this document have been used exclusively for information purposes and are used to clarify the compatibility of TEXA products with the models of vehicles identified by the trademarks and logos. Because TEXA products and software are subject to continuous developments and updates, upon reading this document they may not be able to carry out the DIAGNOSTICS of all the models and electronic systems of each vehicle manufacturer mentioned within this document. References to the makes, models and electronic systems within this document must therefore be considered purely indicative and TEXA recommends to always check the list of the "Systems that can be diagnosed" of the product and/or software at TEXA authorized retailers before any purchase. **The images and the vehicle outlines within this document have been included for the sole purpose of making it easier to identify the vehicle category (car, truck, motorbike, etc.) for which the TEXA product and/or software is intended.** The data, descriptions and illustrations may change compared to those described in this document. TEXA S.p.A. reserves the right to make changes to its products without prior notice.
